

# THE PRODUCT

Panelized wall systems combine time-tested building methods with modern technology. Built in a quality and climate controlled environment this method delivers customizable, energy efficient, beautiful new homes and structures.

Panelized wall systems are:

- Pre-engineered and meet or exceed the building codes and standards of stick built site construction
- Customized to the needs of the builder, buyer, designer or architect
- Constructed from detailed design drawings to exact specifications
- Built in Atlantic Canada using local lumber whenever possible
